Directly west of Yakima. The strip slopes up to the east and should be approached cautiously. Walk to the lake, and try your hand at fishing for silvers. Camping facilities adjacent to the airstrip.

On the west side of the Cascades, this beautiful area has not yet been discovered. Mountains, rivers, hiking, and a handful of antique shops in town a few hundred yards from the airstrip. Walk to town for lunch.

Jim grew up on this land. Pick wild strawberries right on the field, but watch for deer, elk, bear, and coyotes on the first approach. About a mile walk to a greasy spoon restaurant just south of the airport.

Slight uphill grade going west. Sage brush and high desert land is all you will see to the north, but this is what all this country looked like prior to irrigation!
